

Another Successful Stoughton Conservation 2021- 58th annual Ice Fisheree on Lake Kegonsa

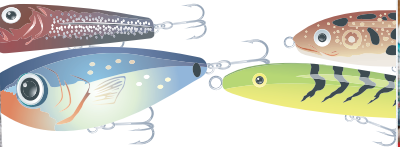

The day of the event, the weather was very cold with temperature below zero wind chills. We had ice for those that elected to brave the cold and participate in the fishing and those lucky enough where able to catch a few fish.

The "Tagged Walleye" from Gollon Bait and Fish Farm worth \$10,000 had been officially tagged and released with assistance from the WI DNR. Unfortunately, no one caught the tagged fish. It remains in the lake to be a lure for someone to still earn a \$100.00 reward, if caught before the night of next year's fisheree event.

The success and accomplishment to raise the funds that were on focus for this project is due to so many: Thank you to those who participated in the event and supported the event by purchasing tickets. A special thank you to Springers of Lake Kegonsa and the many wonderful businesses that so generously sponsored and or donated prizes to the SCC Ice Fisheree event.

As we have in the past, the proceeds from our Ice Fisheree event are mostly placed back into the lake with walleye fish stocking, and lake improvements. Last September we stocked approximately 7000 large fingerling walleyes. We also provide programs for the youth through the Stoughton Conservations Club as we stand behind our Education-Conservation-Participation history and donations to our community's needs.

Not forgetting the kids... games were short and sweet because of the safely of weather and Covid. With just a few quick games, all the kids that participated went home with several prizes and with pre-made buckets of sawdust with money to sort out and find at home.

The Stoughton Conservation, its Board of Directors and its Ice Fisheree Committee, would like to thank all of its Sponsors, local businesses, and members, for their generosity, donations, and support.
